

STANDARD DESIGN CATALOG

INTRODUCTION

Thank you for your interest in the Source Communications line of products. We hope we can help you find the perfect solution for all your mounting and organization needs. Our goal is to provide you with a modular solution that can grow and change along with your company. We provide mounting solutions for almost any product, and if we do not have it now, we are happy to make it for you.

Our Modular Poles™ are made in America. We start with vertical aluminum extrusions and these are the foundation to mount all your electronic equipment. From monitors to fingerprint scanners, we have a solution!

Upgrading your equipment or changing your POS system? You don't need to replace the pole, just purchase an add on kit. Your modular pole is a modern and sleek way to organize your equipment workspace.

Our UnderStand™ line of products are durable, adaptable and can be used to mount any of the major credit card readers. We use a patented constant friction hinge for tilting that never fails. No more propping up your card reader stands with receipt paper rolls. Our UnderStands and Modular Pole system™ products are future proof. If you upgrade your card reader, you don't need to replace the whole stand. Keep the base mounted and order the correct adapter plate, and your upgrade will be completed seamlessly.
